

About the Course

The Course in Subdivision and Land Development Review focuses on the work of planning commissions in the subdivision and land development review process, from preapplication meetings through project completion. The course is beneficial to both new and experienced planning commission members, other municipal officials, individuals in the development sector, and engineers and surveyors. It is organized into three major sections:

1. The principles of subdivision and land development regulation and ordinance requirements
2. Subdivision and land development review procedures
3. Design and technical standards of subdivision development

Participants get hands-on experience reviewing plans and designing alternative solutions. The course was developed by the Pennsylvania Chapter of the American Planning Association and Penn State Extension Service through their training agency, the Pennsylvania Municipal Planning Education Institute (PMPEI), and is taught by certified PMPEI instructors.
