Montco Expects to Save \$4.2 Million through Energy Performance Contract with Constellation

*Energy and Water Conservation Measures at Montgomery County Courthouse
Support County's Climate Change Action Plan*

Norristown, PA (June 19, 2014) – Montgomery County, Pa. and [Constellation](#) today announced the start of construction for \$2.4 million in water and energy conservation measures at the Montgomery County Courthouse. The conservation measures are guaranteed to provide approximately \$4.2 million in cost savings through the county's 20-year energy performance contract with Constellation. Montgomery County is expected to see a complete return on its investment in less than 12 years.

"This Administration is fulfilling its promise to invest capital dollars in county-owned assets, and to provide the most efficient government possible to its constituents," said Josh Shapiro, chair of the board of county commissioners. "This project represents our commitment to provide a healthy and comfortable work environment for our employees and those visiting the courthouse, while also ensuring that we are environmentally responsible. Additionally, this investment will produce a relatively quick monetary return to the county."

By implementing water and energy conservation measures, Montgomery County expects to conserve an estimated 3 million gallons of water and avoid the creation of 2 million metric tons of carbon dioxide annually over the 20-year contract term.

"Energy performance contracting is a valuable resource for customers, like Montgomery County, to leverage their existing operational budgets for needed capital improvements," said Larry Godleski, director, regional energy efficiency, Constellation. "We look forward to working with Montgomery County to meet its environmental goals and reduce energy costs through more efficient systems."

The conservation measures installed by Constellation include: building automation controls upgrades; low-flow toilets and faucets; duct sealing and cleaning; chilled water system optimization; building envelopment improvements such as caulking and weather stripping; and energy-efficient exterior lighting.

Work is scheduled for completion by the end of 2014.

As a [NAESCO](#)-accredited energy services provider, Constellation has helped commercial customers and public agencies throughout the United States to implement energy efficiency programs.

Customers interested in energy efficiency and environmental solutions may contact Constellation at 1-866-237-7693.

About Constellation

The Constellation family of retail electricity and natural gas suppliers (www.constellation.com) are subsidiaries of Exelon Corp., and are leading competitive retail suppliers of power, natural gas and energy products and services for homes and businesses across the continental United States. Constellation's retail businesses serve more than 100,000 business and public sector customers, including more than two-thirds of the Fortune 100, and nearly one million residential customers.

Exelon Corporation (NYSE: EXC) is the nation's leading competitive energy provider, with 2013 revenues of approximately \$24.9 billion. Headquartered in Chicago, Exelon has operations and business activities in 48 states, the District of Columbia and Canada. Exelon is one of the largest competitive U.S. power generators, with more than 35,000 megawatts of owned capacity comprising one of the nation's cleanest and lowest-cost power generation fleets. The company's Constellation business unit provides energy products and services to approximately 100,000 business and public sector customers and approximately 1 million residential customers. Exelon's utilities deliver electricity and natural gas to more than 7.8 million customers in central Maryland (BGE), northern Illinois (ComEd) and southeastern Pennsylvania (PECO).
