Measles Information

Norristown, PA (February 6, 2015) – Montgomery County Health Department (MCHD) is investigating a report of physician suspected measles in a 15 year-old male from Montgomery County.

The patient has been evaluated and testing has been conducted in order to determine if this is a true case of measles. Specimens are currently being delivered to the State Public Health Laboratory.

The patient is self-isolating at home under the guidance of our Department until the results of the lab work are completed.

MCHD has already initiated a comprehensive public health response and the investigation is ongoing.
