**Montgomery County Community Planning Assistance Program**

The Montgomery County Community Planning Assistance Program provides technical assistance in the fields of comprehensive planning, zoning, land use, transportation, landscape design, economic development, and other disciplines on a fee-for-service basis. Townships and boroughs can benefit from this program by entering into a planning assistance contract with our commission. Under the contract, which typically lasts for three years, the cost of the professional planner is evenly shared between the municipality and the county.
