Easton Road Bridge Construction in Glenside

Easton Road remains open with weight restrictions while construction is underway to replace an adjacent box beam bridge over the Tookany Creek in Glenside.

The first phase of construction began September 24, 2018 and has resulted in traffic lanes being shifted to one side of the bridge and a 13 ton weight restriction that requires trucks and buses to use a detour. The first phase is expected to be completed by the end of the year, at which time traffic will be shifted to the new portion of the bridge and the weight restrictions lifted.

The second phase of construction is expected to begin when the weather breaks sometime in March or April of 2019. Construction is expected to be completed by summer of 2019.

We will continue to provide updates as the project continues.
