Nathan’s Story

Nathan Barnica is a happy, fun loving, full of life 8th grader who loves to spend time with his family, friends and bowl a 300. On October 28th, after a week of flu-like symptoms, Nate began to suffer facial palsy and profound weakness in his arms and legs. He was diagnosed with Acute Flaccid Myelitis. **Acute flaccid myelitis (AFM)** is a rare but serious condition. It affects the nervous system, specifically the area of spinal cord called gray matter, which causes the muscles and reflexes in the body to become very weak, and ultimately causes loss of function all together. This condition is not new, but the increase in cases is new. Still, the CDC estimates that less than one in a million people in the United States will be diagnosed with AFM every year. There is a lot they don’t know about the cause and the recovery process with AFM. Nate was recently transferred to Kennedy Krieger Institute in Baltimore to begin intensive physical therapy. After time off from work, significant uncovered medical costs and therapies, medical equipment, travel and lodging expenses, we are asking for help to ease the financial strain now and in the future for Nate’s family.

LEGAL SUPPORT

Controlled F.O.R.C.E. takes stringent measures to maintain the integrity of our system, remain viable in the ever changing legal environment, and to adequately document our certification process. Our system is very recognizable, and we stand behind it 100%. Providing a Certified Departmental Instructor can demonstrate that they teach the system according to our lesson plan, and not beyond, there should never be a question as to the reasonableness of what was taught. As you know, there are too many variables as to how a system is applied in a response to resistance situation for a company to guarantee that the techniques used will work as expected or be the appropriate response. However, Controlled F.O.R.C.E. will gladly provide expert testimony should the techniques that we teach ever be questioned in a court of law.
