TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE LO**

LIMERICK TOWNSHIP, Pa. (January 2, 2020) -- Pennsylvania American Water today issued a boil water advisory for customers in Limerick Township in the company's Royersford system due to an issue with a system control that resulted in a loss in positive water pressure. Approximately 4,635 customers are affected.

Pennsylvania American Water experienced a drop in positive water pressure due to a monitoring system malfunction. As a result, there is an increased chance that the water might contain disease-causing organisms. Crews are working to correct the issue and restore system pressure as quickly as possible.

This notice applies to some customers in Limerick Township in the Royersford water distribution system. For map of the affected area, visit pennsylvaniaamwater.com and click on Alert Notifications.

DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all water to a rolling boil, let it boil for one minute, and cool before using; or use bottled water. You should use boil or bottled water for drinking, making ice, washing dishes, brushing teeth and food preparation until further notice.

Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses and parasites, which can cause symptoms such as nausea, cramps, diarrhea and associated headaches.

These symptoms are not caused only by organisms in drinking water, but also by other factors. If you experience any of these symptoms and they persist, you may wish to consult with your health care provider. People with severely compromised immune systems, infants and some elderly may be at increased risk. These people should seek advice about drinking water from their health care providers.

General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at 1-800-426-4791.

To ease this inconvenience, Pennsylvania American Water will be stationing tankers of potable water beginning at 1 p.m. today at the following locations:

- Limerick Township Building (rear): 646 W. Ridge Pike, Limerick
- 640 N. Lewis Rd., Limerick
- Giant Foods/Target, 1824 Ridge Pike, Upper Providence Township

- Limerick Diner, 411 Ridge Pike, Limerick

Tankers will be available daily from 7 a.m. to 10 p.m. until the advisory is lifted. Customers should bring their own containers to fill.

What is being done?

Pennsylvania American Water crews are working to normalize water pressure in the Royersford system and restore regular service to all customers. Pennsylvania American Water will collect and analyze additional water quality samples including bacteria samples.

We will inform you when the corrective actions have been completed and you no longer need to boil your water. This information will also be provided on Pennsylvania American Water's website at www.pennsylvaniaamwater.com, under the **Alerts Notifications** section. For more information, contact Pennsylvania American Water's customer service center at (800) 565-7292.
