Public Safety News Information Sheet

What is Public Safety News?

Public Safety News, often referred to as PSN, is the monthly newsletter produced by the Montgomery County Department of Public Safety. It has been published since 2002 and is now in its 19th year in print.

Public Safety News contains important announcements from the Department of Public Safety for municipal responders, as well as training announcements, career opportunities, and other significant updates.

What are the Monthly Notices?

The Monthly Notices are formatted as a merged PDF that includes announcements for community events, training/education opportunities, fundraisers, and job offerings. Some content is provided by the Department of Public Safety, but most is received from municipalities and partner agencies. The notices are posted on the Department of Public Safety website along with PSN.

How do I receive alerts when PSN is available?

PSN and the Monthly Notices are typically made available on the department website on the last business day of each month. An email alert is sent to subscribers as soon as the newest editions are posted. The email contains a link to access the newsletter, as well as a listing of articles in the current edition. If you would like to begin receiving alerts, please contact us using the information below.

How do I access past Public Safety News or Monthly Notices?

Past editions of the Public Safety News and Monthly Notices are available on the following webpage: https://www.montcopa.org/1527/Public-Safety-News.

My organization or department has something to share. How do we do it?

The Department of Public Safety has a lot of information to share, but we are always looking for news from our municipal responders! If you have a story, training or career opportunity, or newsworthy event, please contact us using the information below.

I have some additional questions. How do I contact you?

Please complete the following 4 questions:

1. Is the person to be vaccinated sick today?    Yes  No  Don’t know
2. Does the person to be vaccinated have an allergy to eggs or a component of the influenza vaccine? If so, to what? _____________________________.
   Yes  No  Don’t know
3. Has the person to be vaccinated ever had a serious reaction to influenza vaccine in the past?    Yes  No  Don’t know
4. Has the person to be vaccinated ever had Guillain-Barre syndrome? Yes  No  Don’t know

~ Please complete page 2 ~
I have received a Vaccine Information Statement (VIS) and consent to the administration of the influenza vaccine (flu shot). The Montgomery County Office of Public Health may be billing your insurance. Please be assured there will be NO COPAY and NO COST to you even if the claim is denied.

SIGNATURE: ___________________________________________                            DATE: ___________________
(or Parent/Legal Guardian)

The flu shot is the most effective way to prevent the spread of flu. Thank you for doing your part to protect yourself, your family, and your community.

Frequently Asked Questions

Why are you asking for my insurance information?
If you have health insurance that covers flu vaccinations, the Office of Public Health may seek reimbursement from your insurance provider for this service. Please be assured there will be no co-pay or cost to you, even if a claim is denied.

Can pregnant women get the influenza vaccine?
Yes. In fact, this is one of two vaccines that pregnant women are urged to get during pregnancy; the other is Tdap. Because pregnant women are more likely to experience complications and hospitalization as a result of infection with influenza, it is important for them to be immunized. In addition, studies have shown that babies of women who were immunized with influenza vaccine during pregnancy are less likely to be infected with influenza during the first six months of life, before they are old enough to be vaccinated.

Can I get a flu shot if I’m allergic to eggs?
Yes. The recommendations for influenza vaccination for people with an egg allergy have been modified. The Advisory Committee on Immunization Practices (ACIP) states that persons who report having had reactions to egg, may receive any licensed and recommended age-appropriate influenza vaccine. Persons aged 18 years or older with severe allergic reaction (e.g., anaphylaxis) to egg may receive Flublok, which is considered egg-free.

Where can I find more information about flu vaccine?
www.montcopa.org/flu - complete Office of Public Health flu clinic schedule and links to other locations
www.cdc.gov/flu and www.flu.gov – resources, education and printable brochures, flyers, etc.
Influenza (Flu) Vaccine (Inactivated or Recombinant): What you need to know

1. Why get vaccinated?

Influenza vaccine can prevent influenza (flu).

Flu is a contagious disease that spreads around the United States every year, usually between October and May. Anyone can get the flu, but it is more dangerous for some people. Infants and young children, people 65 years of age and older, pregnant women, and people with certain health conditions or a weakened immune system are at greatest risk of flu complications.

Pneumonia, bronchitis, sinus infections and ear infections are examples of flu-related complications. If you have a medical condition, such as heart disease, cancer or diabetes, flu can make it worse.

Flu can cause fever and chills, sore throat, muscle aches, fatigue, cough, headache, and runny or stuffy nose. Some people may have vomiting and diarrhea, though this is more common in children than adults.

Each year thousands of people in the United States die from flu, and many more are hospitalized. Flu vaccine prevents millions of illnesses and flu-related visits to the doctor each year.

2. Influenza vaccine

CDC recommends everyone 6 months of age and older get vaccinated every flu season. Children 6 months through 8 years of age may need 2 doses during a single flu season. Everyone else needs only 1 dose each flu season.

It takes about 2 weeks for protection to develop after vaccination.

3. Talk with your health care provider

Tell your vaccine provider if the person getting the vaccine:

- Has had an allergic reaction after a previous dose of influenza vaccine, or has any severe, life-threatening allergies.
- Has ever had Guillain-Barré Syndrome (also called GBS).

In some cases, your health care provider may decide to postpone influenza vaccination to a future visit.

People with minor illnesses, such as a cold, may be vaccinated. People who are moderately or severely ill should usually wait until they recover before getting influenza vaccine.

Your health care provider can give you more information.
Risks of a vaccine reaction

- Soreness, redness, and swelling where shot is given, fever, muscle aches, and headache can happen after influenza vaccine.
- There may be a very small increased risk of Guillain-Barré Syndrome (GBS) after inactivated influenza vaccine (the flu shot).

Young children who get the flu shot along with pneumococcal vaccine (PCV13), and/or DTaP vaccine at the same time might be slightly more likely to have a seizure caused by fever. Tell your health care provider if a child who is getting flu vaccine has ever had a seizure.

People sometimes faint after medical procedures, including vaccination. Tell your provider if you feel dizzy or have vision changes or ringing in the ears.

As with any medicine, there is a very remote chance of a vaccine causing a severe allergic reaction, other serious injury, or death.

What if there is a serious problem?

An allergic reaction could occur after the vaccinated person leaves the clinic. If you see signs of a severe allergic reaction (hives, swelling of the face and throat, difficulty breathing, a fast heartbeat, dizziness, or weakness), call 9-1-1 and get the person to the nearest hospital.

For other signs that concern you, call your health care provider.

Adverse reactions should be reported to the Vaccine Adverse Event Reporting System (VAERS). Your health care provider will usually file this report, or you can do it yourself. Visit the VAERS website at www.vaers.hhs.gov or call 1-800-822-7967. VAERS is only for reporting reactions, and VAERS staff do not give medical advice.

The National Vaccine Injury Compensation Program

The National Vaccine Injury Compensation Program (VICP) is a federal program that was created to compensate people who may have been injured by certain vaccines. Visit the VICP website at www.hrsa.gov/vaccinecompensation or call 1-800-338-2382 to learn about the program and about filing a claim. There is a time limit to file a claim for compensation.

How can I learn more?

- Ask your healthcare provider.
- Call your local or state health department.
- Contact the Centers for Disease Control and Prevention (CDC):
  - Call 1-800-232-4636 (1-800-CDC-INFO) or
  - Visit CDC’s www.cdc.gov/flu
BATTERY DESCRIPTION

This new battery features increased 3100mAh capacity and improved cold temperature performance. It is certified for use with intrinsically safe APX 6000/XE and SRX 2200 radios. The new PMNN4547 battery will require new plastic carry holsters and leather carry cases to accommodate a 3mm increase in thickness compared to the current NNTN8930 battery.

APX 7000/XE models requiring UL Certification will continue to support and ship with NNTN8930.

Montgomery County
Response Staffing Number Standard

A Recommended Practice

By the Montgomery County Fire Service

George Wilmot, President
Montgomery County
Fire Chiefs Association

John R. Waters, President
Montgomery County
Municipal Fire Officers Association

December 2016
ABSTRACT

We, the representatives of the fire service of Montgomery County, recommend that a standard and consistent system for announcing staffing levels on responding apparatus be adopted county-wide.

Further, we recommend that only the number interior qualified firefighters aboard responding apparatus be announced.

In addition, we recommend that “interior qualified firefighters” be defined as firefighters who have trained to the IFSAC / ProBoard Firefighter 1 standard\(^1\) or equivalent training, and that “equivalent training” be defined as successful completion of current or former interior firefighter courses, covering the subjects listed in Chapter 5 of NFPA 1001\(^2\), whether attained in Pennsylvania or any other state.

\(^{2}\) Ibid.
PURPOSE

- The intent of paper is to recommend a common standard to be used by all fire service providers responding within Montgomery County by providing a consistent and accurate count of available Interior Qualified Firefighters responding to emergency incidents.
- The standard is intended to provide the incident commander with the number of available Interior Qualified Firefighters responding to his/her incident.

LIMITATIONS

- The intent of this paper is not to recommend apparatus staffing levels during emergency response. That is at the sole discretion of the responding entity and its political subdivision.³

THE CURRENT SYSTEM

Adequacies

- When used, the current system does provide a number of emergency responders on any given piece of fire apparatus responding to an incident.

Deficiencies

- The current system is not adopted county-wide.
- In some cases, companies count the driver and other cases, companies do not, leading to inconsistency.
- The issue of “who counts” is determined on an individual company basis, also leading to inconsistency.

SCOPE

- It is intended that this standard apply to all fire service providers responding to emergency incidents within Montgomery County.

DEFINITIONS

- **Interior Qualified** – firefighters who have trained to IFSAC / ProBoard Firefighter 1 standard\(^4\) or equivalent training.

- **Equivalent Training** – current or former interior firefighter courses, covering the subjects listed in Chapter 5 of NFPA 1001\(^5\), whether attained in Pennsylvania or any other state.

RECOMMENDED STANDARD

1. When a piece of fire apparatus responds, they shall identify the unit and the number of interior qualified firefighters aboard.
   a. Example – When “Engine 1” responds with a driver / operator and 3 firefighters, all of whom are interior qualified, they would announce “Engine 1 responding with 4.”

2. Non-interior qualified firefighters shall not be included in the count.
   a. Example – When “Engine 1” responds with a driver / operator and 3 firefighters, and all but one are interior qualified, they would announce “Engine 1 responding with 3.”

3. When a piece of fire apparatus responds with only a driver / operator, that unit should announce “Engine 1 responding driver only.”

4. When a piece of apparatus responds with only non-interior qualified firefighters, that unit should respond “driver only.”
   a. Example – When “Engine 1” responds with a driver / operator and 3 firefighters, none of whom are interior qualified, they would announce “Engine 1 responding driver only.”

5. The terms “undermanned” or “understaffed” shall not be used.

\(^4\) Ibid.
\(^5\) Ibid.
RESPONSIBILITY

- All officers and members of fire service providers, who are operating on Montgomery County’s radio system, including out-of-county resources responding into Montgomery County, are expected to adhere to this standard.

Frequently Asked Questions about NARCAN® (naloxone HCl) Nasal Spray

**Shelf-Life Extension and Updated Storage Conditions**

**What is NARCAN® Nasal Spray?**

- NARCAN® Nasal Spray is a prescription medicine used for the treatment of a known or suspected opioid overdose emergency with signs of breathing problems and severe sleepiness or not being able to respond.
- NARCAN® Nasal Spray is to be given right away and does not take the place of emergency medical care. Get emergency medical help right away after giving the first dose of NARCAN® Nasal Spray, even if the person wakes up.

**Please see Important Safety Information below**

**Who should not use NARCAN® Nasal Spray?**

**Do not use NARCAN® Nasal Spray** if you are allergic to naloxone hydrochloride or any of the ingredients in NARCAN® Nasal Spray.

**What is the new shelf life of NARCAN® Nasal Spray?**

NARCAN® expiration will now be changed from 24 to 36 months.

**Will current, on-market NARCAN® Nasal Spray’s expiration be extended an additional 12 months?**

The FDA has approved the 36-month shelf-life after completing a comprehensive review of data which included all versions of NARCAN®. Since this study was conducted using all versions of NARCAN®, any product previously released with a 24-month shelf life can now be extended for an additional 12 months.

**What are the updated storage conditions for NARCAN® Nasal Spray?**

**Current Label:** Store NARCAN® Nasal Spray in the blister and cartons provided.

- Store at controlled room temperature 68°F to 77 °F (20°C to 25°C).
- Excursions permitted between 41°F to 104°F (5°C to 40°C).
- Do not freeze or expose to excessive heat above 104°F (40°C). Protect from light. NARCAN® Nasal Spray freezes at temperatures below 5°F (-15°C). If this happens, the device will not spray. Leave the device at room temperature for 15 minutes to thaw the medicine before use.

**New Label:** Store NARCAN® Nasal Spray in the blister and cartons provided.

- Store below 77°F (25°C). Excursions permitted up to 104°F (40°C).
- Do not freeze or expose to excessive heat above 104°F (40°C). Protect from light.
- NARCAN® Nasal Spray freezes at temperatures below 5°F (-15°C). If this happens, the device will not spray. If NARCAN® Nasal Spray is frozen and is needed in an emergency, do NOT wait for NARCAN® Nasal Spray to thaw. Get emergency medical help right away. However, NARCAN® Nasal Spray may be thawed by allowing it to sit at room temperature for 15 minutes, and it may still be used if it has been thawed after being previously frozen.

**Important Safety information for NARCAN® Nasal Spray**

**What is the most important information I should know about NARCAN® Nasal Spray?**

NARCAN® Nasal Spray is used to temporarily reverse the effects of opioid medicines. The medicine in NARCAN® Nasal Spray has no effect in people who are not taking opioid medicines. Always carry NARCAN® Nasal Spray with you in case of an opioid overdose.

1. Use NARCAN® Nasal Spray right away if you or your caregiver think signs or symptoms of an opioid overdose are present, even if you are not sure, because an opioid overdose can cause severe injury or death. Signs and symptoms of an opioid overdose may include:
   - unusual sleepiness and you are not able to awaken the person with a loud voice or by rubbing firmly on the middle of their chest (sternum)
   - breathing problems including slow or shallow breathing in someone difficult to awaken or who looks like they are not breathing
the black circle in the center of the colored part of the eye (pupil) is very small, sometimes called "pinpoint pupils," in someone difficult to awaken

2. Family members, caregivers, or other people who may have to use NARCAN® Nasal Spray in an opioid overdose should know where NARCAN® Nasal Spray is stored and how to give NARCAN® Nasal Spray before an opioid overdose happens.

3. Get emergency medical help right away after giving the first dose of NARCAN® Nasal Spray. Rescue breathing or CPR (cardiopulmonary resuscitation) may be given while waiting for emergency medical help.

4. The signs and symptoms of an opioid overdose can return after NARCAN® Nasal Spray is given. If this happens, give another dose after 2 to 3 minutes using a new NARCAN® Nasal Spray device and watch the person closely until emergency help is received.

What should I tell my healthcare provider before using NARCAN® Nasal Spray?
Before using NARCAN® Nasal Spray, tell your healthcare provider about all of your medical conditions, including if you:

- have heart problems
- are pregnant or plan to become pregnant. Use of NARCAN® Nasal Spray may cause withdrawal symptoms in your unborn baby. Your unborn baby should be examined by a healthcare provider right away after you use NARCAN® Nasal Spray.
- are breastfeeding or plan to breastfeed. It is not known if NARCAN® Nasal Spray passes into your breast milk.

Tell your healthcare provider about the medicines you take, including prescription and over-the-counter medicines, drugs, vitamins, and herbal supplements.

What are the possible side effects of NARCAN® Nasal Spray?
NARCAN® Nasal Spray may cause serious side effects, including:
Sudden opioid withdrawal symptoms which can be severe. In someone who has been using opioids regularly, opioid withdrawal symptoms can happen suddenly after receiving NARCAN® Nasal Spray and may include:

- body aches
- diarrhea
- increased heart rate
- fever
- runny nose
- sneezing
- goose bumps
- sweating
- yawning
- nausea or vomiting
- nervousness
- restlessness or irritability
- shivering or trembling
- stomach cramping
- weakness
- increased blood pressure

Some patients may show aggressive behavior upon abrupt reversal of an opioid overdose.
In infants under 4 weeks old who have been receiving opioids regularly, sudden opioid withdrawal may be life-threatening if not treated the right way. Signs and symptoms include: seizures, crying more than usual, and increased reflexes.

These are not all of the possible side effects of NARCAN® Nasal Spray. Call your doctor for medical advice about side effects. You may report side effects to the FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.
