

Family Mentoring and Advocacy

Family Mentor and Advocacy Network

A project of the Mental Health Association of Southeastern Pennsylvania

Family & Youth Division

Vision : Individuals challenged by mental health conditions are empowered to direct their recovery journeys, and family members are prepared to play supportive roles, all as members of informed and inclusive communities.

Mission : To promote groundbreaking ideas and create opportunities for resilience and recovery by applying the knowledge learned from the people we support, employ, and engage in transformative partnerships.

We provide direct support to families. Our Family Mentors and Youth Mentors use their own experiences to inspire hope and provide support to others who are facing similar challenges. We help create connections at all levels of our community. We help empower families and youth to have a positive impact on their own lives, on the lives of other families living with similar challenges and on organizations who offer services to families.

We are a part of a community committed to creating an environment that meets the needs of young people and their families. We work collaboratively with county, community and provider advisory and policy groups which impact the lives of children and their families. We can help parents, caregivers and youth use their strengths and build skills so they can influence the child serving systems with regards to service planning, system development and evaluation.
