

# REVITALIZATION PLANS

The revitalization plan is intended to create a dynamic economic development strategy that will strengthen and stabilize a community's older neighborhoods and commercial areas. It provides a roadmap to respond to market trends and renew the community, creating a more vibrant, livable, and attractive place to work and visit. Revitalization plans can address physical elements in a community as well as changes to local policies and programs.

MCPC Services & Resources

Our staff is experienced in economic development planning and establishing creative revitalization strategies involving physical improvements, regulatory changes, organizational recommendations, and new innovative community programs and events. We use innovative approaches to develop creative ideas and solutions that will attract new businesses, visitors, and residents. Working closely with economic development tools from the Montgomery County Commerce Department, Redevelopment Authority, and the MontcoWorks team, we offer a full set of resources for communities to revitalize.
