

Montgomery County Oral Health Task Force

The task force is dedicated to improving access to oral health services.

Everyone should have a dental home. Regular dental care is essential to improving and maintaining both your oral and physical health.

Please be sure that you are talking with the dentist about your fluoride needs, particularly for children. There are various sources of fluoride and it is important to know that everyone is getting the optimal amount.

Use this guide to find a dental home and please comply with all the recommendations of your dentist and dental hygienist to ensure your oral health.
